What is palliative care?

Palliative care is a specialized field of nursing that focuses on providing relief from the symptoms of serious illnesses. Palliative care can be provided at any stage of an illness, from diagnosis to end-of-life. The goal of palliative care is to improve the quality of life for patients and their families.

What are the benefits of palliative care?

Palliative care can provide a number of benefits for patients and their families, including:

- Relief from symptoms such as pain, nausea, and fatigue
- Improved quality of life
- Reduced need for hospitalizations
- Increased satisfaction with care
- Support for family members and caregivers

What does an advanced practice palliative nurse do?

Advanced practice palliative nurses are registered nurses who have received additional education and training in palliative care. They are able to provide a wide range of services, including:

- Symptom management
- Psychosocial support
- Ethical counseling
- Care coordination
- Education
- Research

Who can benefit from advanced practice palliative nursing?

Advanced practice palliative nursing can benefit anyone with a serious illness, regardless of their age, diagnosis, or prognosis. Some of the common conditions that palliative care can help with include:

- Cancer
- Heart failure
- Kidney failure
- COPD
- ALS
- Dementia

How do I find an advanced practice palliative nurse?

To find an advanced practice palliative nurse, you can ask your doctor or other healthcare provider for a referral. You can also search online for palliative care providers in your area.
