Global inequality is a pressing issue that has significant implications for the future of humanity. This book examines the causes and consequences of global inequality, and explores its implications for the motivation of individuals and societies. The book argues that global inequality is a major obstacle to human progress, and that it must be addressed if we are to create a more just and sustainable world.

The book begins by exploring the different ways in which global inequality can be measured. It then examines the causes of global inequality, including factors such as trade, investment, and technology. The book also discusses the consequences of global inequality, including its impact on poverty, health, and education. Finally, the book explores the implications of global inequality for the motivation of individuals and societies. It argues that global inequality can lead to a sense of injustice and resentment, which

can undermine social cohesion and make it difficult to achieve collective goals.

The book concludes by calling for a renewed commitment to global justice. It argues that we must work together to create a more equitable world, in which all people have the opportunity to live a good life. This will require a fundamental change in the way we think about global inequality, and a willingness to challenge the status quo. But it is a change that is essential if we are to create a more just and sustainable future for all.

Key Features

- A comprehensive overview of the causes and consequences of global inequality
- An exploration of the implications of global inequality for the motivation of individuals and societies
- A call for a renewed commitment to global justice

Reviews

"A timely and important book that sheds light on one of the most pressing issues facing humanity today." - Professor Michael Sandel, Harvard University

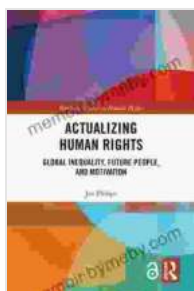

"A must-read for anyone who wants to understand the challenges facing our world and how we can overcome them." - Professor Martha Nussbaum, University of Chicago

"A powerful indictment of global inequality and a call to action for a more just world." - The Guardian
