

Life, Death, and Geopolitics in the New Arctic: An Engaging Exploration of the Changing Arctic Landscape

By Robert Huebert

The Arctic is changing. The ice is melting, the permafrost is thawing, and the wildlife is adapting to a new climate. These changes are having a profound impact on the people who live in the Arctic, and on the global community as a whole.

After the Ice: Life, Death, and Geopolitics in the New

In his new book, Life, Death, and Geopolitics in the New Arctic, Robert Huebert explores the changing Arctic landscape and its implications for the world. Huebert, a leading expert on Arctic affairs, provides a comprehensive overview of the challenges and opportunities facing the Arctic today.

Huebert begins by examining the physical changes taking place in the Arctic. He describes the melting ice, the thawing permafrost, and the changing wildlife populations. He also discusses the impact of these changes on the people who live in the Arctic, including the Inuit, the Sami, and the Russians.

In addition to the physical changes, Huebert also examines the geopolitical changes taking place in the Arctic. The Arctic is becoming increasingly accessible, and this is leading to increased competition between nations for resources and territory. Huebert discusses the role of the Arctic Council, an international organization that promotes cooperation in the Arctic, and the challenges it faces in managing the changing Arctic landscape.

Life, Death, and Geopolitics in the New Arctic is a timely and important book. It provides a comprehensive overview of the challenges and opportunities facing the Arctic today, and it offers valuable insights into the future of the Arctic and its impact on the global community.

Reviews
