Long/short equity funds typically invest in both long and short lists of equity securities, generally focusing on the US but also holding assets worldwide and in response to market opportunities. Managers typically have the flexibility to shift investments to growth, value, or income to large capitalization stocks, and may long or short. Managers may also trade equity futures and options as well as equity related securities and debt or gold positions. This set of funds has exceeded their traditional long-only equity peers. Control Your Emotions
