Sarah's husband, John, was diagnosed with ALS in 2016. ALS is a progressive neurological disease that affects the motor neurons in the brain and spinal cord. As the disease progresses, it can lead to paralysis, difficulty breathing, and eventually death.

Sarah and John were married for just over ten years when John was diagnosed with ALS. They had two young children at the time. After John's diagnosis, Sarah became his primary caregiver. She helped him with

everything from eating and bathing to getting dressed and using the bathroom.

Caring for John was a challenging and emotionally draining experience for Sarah. She had to watch as her husband's body slowly deteriorated. She also had to deal with the emotional rollercoaster of watching John lose his independence and his ability to communicate.

Despite the challenges, Sarah never gave up on John. She loved him dearly, and she was determined to make the most of their time together. She took him on trips, they spent time with friends and family, and they made memories that they would cherish forever.

John passed away in 2017, just ten months and ten days after he was diagnosed with ALS. Sarah was heartbroken, but she was also grateful for the time she had with him. She knew that he would always be with her in her heart.

Ten Months And Ten Days With ALS is a powerful and moving tribute to John and to all those who have been affected by ALS. It is a story of love, loss, and the human spirit. It is a story that will stay with you long after you finish reading it.
